Mr. Ricardo C. Duenas
Administrator
Guam Environmental Protection Agency
P.O. Box 2999
Agana, Guam 96910

Dear Mr. Duenas:

I am writing to apprise you of current Superfund actions regarding hazardous wastes in the Insular Territories. As you know, each state or territory is allowed the opportunity to designate a highest priority site under the Comprehensive Environmental Response, Compensation, and Liability Act and Guam has named the Ordot Landfill. Recently you reviewed the draft Remedial Investigation Plan developed by the Zone Contractor, Black & Veatch, in which additional locations of hazardous wastes were acknowledged. We must remind you that although we are cognizant of the situation that hazardous wastes are located throughout the islands, the intent of this study is to focus on the highest priority sites of the Insular Territories. Therefore, we will not be able to include the additional locations within the scope of this particular remedial investigation. The remedial investigation of highest priority sites of the Insular Territories is scheduled to begin November 3, 1982. The itinerary is enclosed for your information.

In order for EPA to consider addressing the problem of additional sites in the Insular Territories, certain basic information about each site is needed. Norman Lovelace will be compiling this information during the coming weeks.

Please share this update with all those who have participated in the review and development of the draft Remedial Investigation Plan. We wish to thank everyone for their
